

IEEE SSCI 2025 Competition

- **Four Accepted Competitions**

Title

Evolutionary Computation in the Energy Domain: 2025 Edition of the Risk-based Energy Scheduling

Organizers names and affiliations

Fernando Lezama, GECAD, LASI, Polytechnic of Porto, Portugal. (flz@isep.ipp.pt)

João Soares, GECAD, LASI, Polytechnic of Porto, Portugal. (jan@isep.ipp.pt)

Bruno Canizes, GECAD, LASI, Polytechnic of Porto, Portugal. (bmc@isep.ipp.pt)

Filipe Sousa, GECAD, LASI, Polytechnic of Porto, Portugal. (ffeso@isep.ipp.pt)

Zita Vale, GECAD, LASI, Polytechnic of Porto, Portugal. (zav@isep.ipp.pt)

2-3 sentences to explain the competitions about

The competition aims to bridge the knowledge gap between computer and AI scientists and energy experts by providing a risk-based energy resource management framework where CI experts can test their metaheuristic algorithms and evaluate their efficacy in a real-world problem beyond the typical benchmark CI problems.

Title

LLM designed EA

Organizers names and affiliations

- Michal Pluhacek, Tomas Bata University in Zlin, Czech Republic. (pluhacek@utb.cz)
- Roman Senkerik, Tomas Bata University in Zlin, Czech Republic. (senkerik@utb.cz)
- Tomas Kadavy, Tomas Bata University in Zlin, Czech Republic. (kadavy@utb.cz)

2-3 sentences to explain the competitions about

Join our exciting competition where your creativity meets cutting-edge AI! We're challenging participants to harness the power of large language models to design next-generation evolutionary algorithms. Dive into this innovative space, showcase your skills, and help shape the future of optimization technology.

Title

Electric Energy Consumption Forecast Adopting Multi-criteria Performance Metrics

Organizers names and affiliations

- Luis Gomes, GECAD, LASI, Polytechnic of Porto, Portugal. (lfg@isep.ipp.pt)
- Zita Vale, GECAD, LASI, Polytechnic of Porto, Portugal. (zav@isep.ipp.pt)
- Pedro Faria, GECAD, LASI, Polytechnic of Porto, Portugal. (pnf@isep.ipp.pt)
- João Soares, GECAD, LASI, Polytechnic of Porto, Portugal. (jan@isep.ipp.pt)

2-3 sentences to explain the competitions about

An energy consumption forecast competition that uses real smart building data to assess the quality of novel data preprocessing techniques and forecasting models. One year of real data will be made available for the participants.

Title

Autonomous Drone Racing Competition: Perception and Control

Organizers names and affiliations

- Xuan Huy Pham, Aarhus University, Denmark. (huy.pham@ece.au.dk)
- Andriy Sarabakha, Aarhus University, Denmark. (andriy@ece.au.dk)
